

Y9 Steps to Success – Bishop Grosseteste University Write up 8th May 2019

Rhecca: Going on the trip to BGU gave us an experience and a picture of what University looks like. The ambassadors were really nice and welcoming and we tackled serious issues like finance, homesickness and mental health which really made us think. I would have liked to have seen what courses there are as well and what else we could do after we leave school.

I'd love to go back again if we were able to and access more things. Overall it was a really nice experience and it was new, I was thankful that it didn't seem too crowded.

Jess: When we went to BGU we went into the Gym and the fitness centre and did some activities to get to know who the students were. After that we were split into groups and did some tasks with the reps and the people in our groups. We also had a tour of the Campus and we saw where everything was. Overall I had a good experience and would really enjoy another visit. This was a great opportunity and we had a good time.

Jessica: We went on a tour around BGU and we were shown all of the working spaces, coffee shops and the lecture halls. We learned how to budget money when we are away from home and living at college.

Ollie: The best part of the trip was the group work and touring the campus. The trip inspired me to seriously consider becoming a university student and I enjoyed learning about what life is like there.
