Messingham Zoo is a family run business. The primary aim is to offer something different to larger zoos and wildlife parks by focusing on close up encounters with smaller, friendlier animals. Education forms a big part of what we want to deliver, teaching about animal care and welfare. The zoo is still being established but the vast majority of animals are now on display. New animal attractions are being added all the time as animals arrive.

What makes Messingham Zoo special is that you can get really close to the animals, in some cases even stroking them 😊 The staff are on hand and very friendly, to the point where it feels like you are having a private tour of the zoo.
